August 2, 2005

Mr. Erick Prinze  
Unity Creations  
56 Bloomingdale Road  
Hessville, NY 11801

Dear Erick:

I wanted to thank you for taking the time to work with me on the [redacted] School District to sell the Unity Creations Safety System. It has been a very long hard process but I have received a commitment from Ralph [redacted] of the [redacted] School District that he will give us an opportunity to install our product in one of the school playgrounds in 2006. If our product performs as we have said, then he will standardize on this product for all safety surfacing in the [redacted] School District. The District will start the replacement process of all playgrounds. There are 76 elementary schools in the district and Ralph says that they spend about \$100,000.00 on surfacing for each of the playgrounds. There are 56 elementary schools that the playground surfacing will be replaced in over the next 4 year period. I don't know at this point how the budget is set up, but I will keep you informed as I learn the details.

Our commitment to the District and to Ralph is that you will come [redacted] to supervise the proper installation of the first project. I am going to guess that it will be sometime in late July or early August that the installation will occur. That just happens to be during the time of our great [redacted] fishing season. We will have to make sure that we take advantage of that opportunity as well as secure the business from the school district.

I look forward to working with you on this opportunity and also to show you around our beautiful state [redacted] is a wonderful place and you can only know that after you have been here and taken in some of the sites.

Let me know what additional information I might provide to you in order to ready for this opportunity.

Regards,
