Hicksville, NY 11801

Dear Mr. Prinz,

As per our conversation, we would like to enter into a contract with you regarding your interlocking rubberized safety surface. Right now we have a 3 million dollar plus contract with the City of New York to install interlocking rubber surfaces. The contract is for three years and basically states that the 3 million dollars is to be used for as many installations that can be accomplished within the three year period. We project that the average size would be 5,000 sq. ft. and we should be able to do around 60 of them. About 85% of the 3 million is directly related to your product, and the remaining 15% would be associated with our work. Obviously most of them will be done in the spring time, but as of right now we have at least 2 that we would like to do before year end if weather permits.

Considering that we are signing a three year deal with the City of New York, I assume your price per sq. ft. will never increase during the term of the contract. Unfortunately, winter is approaching soon so it would be most appreciative if you could send me over your contract as soon as possible, so that we can start the process.

If you have any questions, please don't hesitate to contact me. Thank you very much.

Very truly yours,

David [redacted]
