Re: Play Area Surfacing Systems

Gentlemen:

We would like to take this opportunity to thank you for supplying and installing your rubberized unity surfacing system on the rooftop at Bethel Baptist Daycare Center. Your double tile mat block with its double locking system impressed us most. Upon seeing the sample colors that were sent to our office and seeing your product installed at other centers, we decided to go with red and green in a zigzag pattern as seen in your brochure.

The products were delivered expeditiously and the entire job went smoothly. During installation we were impressed with the work your men did by supplying and installing the fabric mesh to protect our roof before they installed the play surface. During installation your men were respectful to our tenant and cleaned up after themselves daily. After the installation was completed they broom cleaned the area for the children to play on immediately. The zigzag pattern looks great, and we would use it on our other locations.

It was a pleasure working with your men and your company and I would recommend your product to anyone.

Sincerely,
Ulban Realty Co.
